ABOUT GSI TECHNOLOGY

Founded in 1995, GSI Technology, Inc. is a leading provider of SRAM semiconductor memory solutions. The Company recently launched radiation-hardened memory products for extreme environments and the Gemini® APU, a memory-centric associative processing unit designed to deliver performance advantages for diverse AI applications. The Gemini APU's architecture features parallel data processing with two million-bit processors per chip. The massive in-memory processing reduces computation time from minutes to milliseconds, even microseconds. Gemini excels at large (billion item) database search applications, like facial recognition, drug discovery, elasticsearch, and object detection. Gemini's scalable format, small footprint and low power consumption, make it an ideal solution for edge applications where rapid, accurate responses are critical.
