

GSI Technology to Participate in 16th Annual "Main Event" Conference

September 7, 2023

SUNNYVALE, Calif., Sept. 07, 2023 (GLOBE NEWSWIRE) -- **GSI Technology, Inc. (Nasdaq: GSIT)**, developer of the Gemini[®] Associative Processing Unit (APU) for AI and high-performance parallel computing (HPPC) and a leading provider of high-performance memory solutions for the networking, telecommunications, and military markets, today announced that Didier Lasserre, Vice President of Sales and Investor Relations will participate in the 16th Annual "Main Event" Conference to be held on October 3 – 5, 2023 at the Luxe Sunset Boulevard Hotel in Los Angeles.

Mr. Lasserre will host a group presentation on Tuesday, October 3 at 3:00-3:25 PM PST in Track 4 and hold one-on-one meetings on Tuesday, October 3 and Wednesday, October 4.

For more information about registering or to schedule a meeting with the Company, please visit the LD Micro conference website https://www.meetmax.com/sched/event_98269/conference_home.html.

ABOUT GSI TECHNOLOGY

Founded in 1995, GSI Technology, Inc. is a leading provider of semiconductor memory solutions. The Company recently launched radiation-hardened memory products for extreme environments in space and the Gemini[®] Associative Processing Unit (APU). This memory-centric design delivers significant performance advantages for diverse AI applications. The Gemini APU architecture removes the I/O bottleneck between the processors and memory arrays by performing massive parallel searches directly in the memory array where data is stored. The novel architecture delivers performance-over-power ratio improvements compared to CPU, GPU, and DRAM for applications like image detection, speech recognition, e-commerce recommendation systems, and more. Gemini is an ideal solution for edge applications with a scalable format, small footprint, and low power consumption where rapid, accurate responses are critical.
