

## **GSI Technology Announces Sampling of 576Mbit Low Latency DRAM (LLDRAM™ II) Family**

May 3, 2011

SUNNYVALE, Calif., May 03, 2011 (BUSINESS WIRE) -- **GSI Technology, Inc. (NASDAQ: GSIT)** today announced that their 576Mbit Low Latency DRAM (LLDRAM II) product line is available for immediate customer evaluation.

GSI's GS4576 family includes 16M x 36, 32M x 18 and 64M x 9 organizations with clock speeds up to 533 MHz (over 38Gbits per second with x36 data bus width) in 144-ball uBGA packages. Both commercial and industrial temperature ranges are offered as standard products.

"The demand for another source of supply is amazing," said Lee-Lean Shu, President, Chairman and Chief Executive Officer at GSI Technology. "Low Latency DRAM technology is a great addition to GSI's best-in-class networking memory product line. With multiple sources now available, we expect to see significant expansion in the market for this class of high transaction rate networking memories."

### **Availability**

GSI Technology's 576Mbit Low Latency DRAM products are ready for customer sampling now. Pricing averages \$42.00 in 1,000 piece quantities, depending on speed and configuration. Visit [http://www.gsitechnology.com/576Mb\\_LLDRAM.htm](http://www.gsitechnology.com/576Mb_LLDRAM.htm) for additional configuration details and ordering information.

### **About GSI Technology**

Founded in 1995, GSI Technology, Inc. is a provider of high performance semiconductor memory solutions to networking, industrial, medical, aerospace and military customers. The company is headquartered in Sunnyvale, California, and has sales offices in the Americas, Europe and Asia. For more information, please visit <http://www.gsitechnology.com>.
